DETAILED ACTION

1. Claims 1-12 of US Application No. 10/840,059, filed on 05/05/2004 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 11-12, drawn to a stabilizer system classified in class 52, subclass 155.
- II. Claims 9-10, drawn to method of anchoring a portable structure, classified in class 52, subclass 741.1.

The Inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Invention II (Claims 9-10) does not require a U-shaped member, Invention I (Claims 1-8 and 11-12)

4. During a telephone conversation with Gregory Nelson on 1/16/2008 an election was made without traverse to prosecute the invention of I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 5 recites the limitation "fastener", in line 20. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 11 recites the limitation "building", in line 18. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-5 AND 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Neal (6,360,571).

10. Regarding claim 1, with reference to Fig. 1, O'Neal discloses a lock with a generally U-shaped anchor member, having first and second legs (18) joined at their proximal end to a bight section (38) and having distal ends; wherein said first and second legs comprise apertures (30) and an attachment member (60) extendable through said legs and said opposed bores (44).

11. Regarding claims 2-5, O'Neal discloses a lock wherein said legs define a plurality of spaced apart apertures (30), and including staking means that comprise bores in said members; and an elongated rod (60) having a threaded end (74) and receiving a nut.

Art Unit: 3633

12. Regarding claims 11-12, O'Neal discloses a lock comprising a frame, an attachment member extendable through said frame, and is provided with bores for receiving ground stakes.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
